UCAN
FASTENING PRODUCTS

PROUDLY CANADIAN

Established in 1967 by Harry Weitz, UCAN FASTENING PRODUCTS has been supplying high quality masonry and metal fasteners to the construction industry for over 50 years. With his extensive technical background in construction and architecture, Harry always possessed a keen interest in fastener design, function and application.

Starting out as a wholesale distributor of innovative fastening products, made in the USA and Europe, UCAN was instrumental in bringing wedge anchors, concrete screws and galvanized spiral nail anchors to the Canadian market in the 1950s and 60s. Harry personally developed the EP932 tie wire anchor, which reduced installation time by 50%, as well as UCAN SCRU-IT®'s unique and efficient scalloped cutting thread. These fasteners gained immediate success in the marketplace.

From it's humble beginnings in a cramped warehouse, UCAN currently operates from an efficient 45,000 sq ft facility in Toronto. UCAN's tight knit team of experienced, caring and knowledgeable outside and inside employees, provide an unrivalled level of customer service. Most orders are shipped the day they are received and order fill rates generally exceed 97%. Also key to UCAN's success is the company's philosophy of constant product improvement through R&D and strict quality control at all stages of production.

UCAN is a 3rd generation, family owned, Canadian company. We supply high-quality masonry and metal fastening systems to a wide network of distributors across Canada and the USA. Our extensive experience in construction allows us to develop anchoring solutions that meet the demanding requirements of architects and engineers.
