

ALUMINUM PLUGS

CORROSION RESISTANT PLUG FOR MASONRY

DESCRIPTION

The UCAN Alex Plug is a corrosion resistant aluminum plug designed for use in all masonry base materials. The unique body design provides a firm grip of both the screw and base material. The Alex Plug is available exclusively from UCAN Fastening Products. This anchor comes in lengths ranging from 1" to 1-1/2" and can be cut to any desired length.

TYPICAL APPLICATIONS

- Light duty fastenings
- Cable clips
- Electric light fixtures

LIMITATIONS

- Not designed for heavy, vibratory or impact loads.

FEATURES

- Corrosion resistant plug
- Suitable for light duty fastening in a broad range of base materials
- Can be cut to any size
- Withstands elevated temperatures
