

SDS MAX CORE CUTTER

The **UCAN SDS MAX CORE CUTTER** is specially suited for the latest generation of powerful rotary hammer tools. Its' one piece design and unique cutting head ensure efficient drilling and superior life.

FEATURES:

- Accurate spot drilling (1)
- Additional raker teeth (2) hollow out the entire core diameter so that no chiselling out is necessary
- High volume flutes (3) for fast removal of dust and debris
- Chisel-shaped carbide teeth (4) allow for fast penetration
- Long life
- Low weight, reduced vibration
- One-piece unit transfers hammer energy to tool without damping losses
- Straight, circular holes and flat base (5)
- Significantly improved performance when drilling rebar
- No need for starter bit or drift key removal of dust and debris
